### Key power supply advantages

- Small size and light weight provide unmatched portability among 12 mm (1/2") machines.
- Boost Conditioner™ (on CSA, 1-PH models) compensates for input voltage variations on 200–240 V lines, providing improved performance on low-line voltage, on motor generators and on fluctuating input power.
- CNC interface and FastConnect™ torch connection increase versatility for handheld and mechanized usage.
- Powercool™ design cools internal components more effectively for greater system reliability and improved uptime.

### Key torch advantages

- Conical Flow™ increases arc energy density for superior cut quality with little dross.
- Patented drag-cutting technology makes it easy to use – even for first-time operators.
- Dual-angle design extends nozzle life and lowers operating cost.
